Dear Doctor,

The above patient attended St Thomas' Emergency Department & Utc on: **17/11/2025 06:43**. Our management summary is as follows:

Source of Referral: Personal - self / family / friends / education / work colleague

Chief Complaint: Abdominal pain

Vomiting -

Hpc: pt states he has been vomiting all night due to being allergic to sugar- pt is diagnosed with delusional disorder with a 'fixed false belief that he has a sugar and milk allergy'. pt states his brothers were playing around with sugar today which has caused reaction. pt states countless episodes vomiting. associated with ap. las did found to be abn, denies chest pain

o/a: alert and talking

unwell/ap/vomiting: abn ecg

Diagnosis:

1. No abnormality detected

known delusional disorder - nil acute

Disposition: Discharge: gp follow up

Additional Info: Disposition Comment/Information for GP:

Presented with vomiting since last night

Thinks food was contaminated with sugar as he is allergic to sugar

Feels better after anti emetic

Brief intervention re beliefs around sugar allergy and understandi

ng of delusional disorder - is open to the potential and states willing to explore diagnosis via GP - although this seems not to have taken place as yet -Kindly follow up on it Thanks

For any admitted patient, a separate summary report will be sent on patient discharge. If you have any queries or would like to discuss details of this attendance please do not hesitate to contact us or check the London Care record for up to date patient results, if applicable.

Sincerely on behalf of,
